

Wellhead

SERVICES

- Wellhead Installation
- Stress Relieving
- Emergency Response
- AWS D1.1 Certified
- Offshore · On Land · Dockside
- Supplies

OUR COMMITMENT

We combine years of experience with the latest equipment and technology to provide equipment and services that meet the highest industry standards. We provide training to keep safety a top priority. We have grown by providing our customers with productive, hands-on management, and evolving product and service capabilities to best meet their needs.

Preheat has installed tens of thousands of wellheads for our Gulf Coast client base and beyond. Our technicians are highly skilled in new wellhead installation and in onsite emergency response, including assessment and remediation. We preheat, weld and test as part of our standard installation procedure; nitrogen and hot-oil testing save valuable time during the installation.

Safety and Service

Feel the heat

Our stress relieving services include large and small ovens at facilities in Carencro and Belle Chasse, La. The internal dimensions of the large furnace allow heat-treating of large vessels or several items simultaneously. The furnace is heated by high velocity gas burners at over 350 MPH producing extremely even heat distribution. We have developed a PC-based stress relieving control system for our fleet of mobile stress relieving units. The system can simultaneously heat treat up to 24 welds using two totally unique, operator-programmed heat cycles in any combination making it extremely versatile. One of the systems most unique features allows it to run different heat cycles simultaneously.

Highly Skilled Professionals

Experience you can trust

We preheat, weld and test as part of our standard installation procedure, saving valuable time during the installation. Preheat also provides post-weld stress relieving, as necessary, according to pipe grade. Our services include:

- AWS D1.1 certified technicians
- Offshore/onshore/inland barge installations
- Nitrogen and hot oil testing
- Beveling bands and crawlers available
- Removal of stuck test plugs and tubing hangers
- Emergency response
- Over 20 years experience
- Technicians come with preheat box and all equipment
